**NOTICE TO SHAREHOLDERS.**  
 TION INSURANCE OFFICE, 1881.  
 IN LIQUIDATION.  
 E LIQUIDATORS having decided to  
 pay a FIRST DIVIDEND of \$500 per  
 share on account of Capital and Reserve.  
 Shareholders are hereby notified that the

Hong, 21st April, 1882. [703]  
**NOTICE.**  
 GEORGE ON LEE, who has achieved  
 a high reputation as a MEDICAL PRAC-  
 TISER in Australia and London, was to leave  
 for Hongkong on the 13th March, and may be ex-  
 pected to arrive on the 23th instant, when he will  
 commence practice in Hongkong.  
 CHUNG SHUN CHAN.  
 Hong Kong, 21st April, 1882. [746]

been consigned to China. We  
our present Stocks in the G

EN & Co. They comprise our well known  
rior COGNAC, PALE DRY SHERRY,  
de' PORT, CLARETS of several quali-  
ties consistent with quality. We ship  
common or inferior.

## NOW ON SALE.

THE CHRONICLE & DIRECTORY FOR CHINA, JAPAN, THE PHILIPPINES, SPAIN, SETTLEMENTS, COCHIN CHINA, SIAM, &c. For 1892.

With which is incorporated THE CHINA DIRECTORY.

THE CHRONICLE & DIRECTORY, which is now in its

THIRTIETH YEAR OF PUBLICATION, has been considerably extended, both in the

Directory proper and in the Appendix. The

ports of CHUNGKING, WUHAN, SHANGHAI, MANCHU, and PENANG have been added to the

former; whilst the latter includes the NEW

ORDER IN COUNCIL for the Government of

BRITISH SUBJECTS IN CHINA AND JAPAN, the

TREATY BETWEEN RUSSIA AND CHINA, the

NEW TREATY BETWEEN THE UNITED STATES

AND CHINA, the NEW TREATY BETWEEN

GERMANY AND CHINA, a translation of the

TREATY BETWEEN SPAIN AND ANNAM signed in 1880, &c.

The ALPHABETICAL LIST OF FOREIGN

RESIDENTS has been increased by upwards of

1,100 names, and gives references to over 2,000

NEW RESIDENTS.

THE CHRONICLE & DIRECTORY is

embellished with the following lithographic

MAPS AND PLANS:—

MAP OF THE ISLAND OF HONGKONG.

PLAN OF THE CITY OF VICTORIA.

MAP OF THE COAST OF CHINA.

PLAN OF THE CITY OF CANTON.

PLAN OF THE FOREIGN SETTLEMENTS AT

SHANGHAI.

PLAN OF YOKOHAMA.

MAP OF THE TOWN AND ENVIRONS OF

SINGAPORE.

The large Edition contains ONE THOUSAND

pages of printed matter. It is indispensable

to every Mercantile Office in the Far East and

will be found a useful work of reference to those

travelling either on business or pleasure.

THE CHRONICLE & DIRECTORY is

published in Two Forms:—Complete at \$5, or

with the List of Residents, Port Descriptions

and Descriptions, Plans of Victoria, Code of

Signals, &c., at \$3.

Orders for Copies may be sent to the

Daily Press Office, where it is published, or to the

following Agents:—

such long standing, that no doubt the

notion of its abolition savours of heresy,

but straw indicates the course of the current,

and recent events have made it seem to us

probable that the time-honoured system may

before long be relegated to the traditional

shell whereon so many of the "har-burns"

are disposed. Coming, as the earlier Western

traders did, amongst a people so strange in

customs, and language, and sentiments as

the Chinese, it may be readily understood

that the office of compradore was a necessity

of the occasion, but we must contend

that it is a necessity no longer. The

ignorance of the people and their ways under

which the earlier traders laboured has gone,

and we have very tolerable ideas of what the

Chinese are really like. The native language

is by no means so difficult of acquisition as

is generally supposed. There has been, and

no doubt there still exists, a very common

impression that Chinese offers almost in-

surmountable difficulties to the student,

so many in fact that it requires the

labour of almost a lifetime to acquire

the language. This is the common

impression, we say, but the real fact is very

different. The written character being

practically arbitrary and the language having

no alphabet as its foundation, it cannot be

denied that the labour attendant upon the

acquisition of the written character is no

severe a task upon the student's application,

memory, and perseverance that it need sur-

prise any one that so few attempt it, nor is

it less surprising that of that number so few

carry the attempt to success. The colloquial

is, however, not difficult, the truth of which

statement is becoming better recognized

every day, and we have frequently heard it

asserted by competent authorities that the

Chinese spoken language is not more diffi-

cult than German or Hindustani. As a

matter of fact the Chinese difficulty of the

character has been erroneously ascribed also

to the language. Why, therefore, should

the Europeans speak to the natives in

ing, and selection, under Domestication" in

1877. It is published in the "Domestica"

and Selection in Relation to Sex, 2 vols;

a new edition, with large additions. In this

work the author refers to "man is descended

from a hairy quadruped, furnished with a tail

and pointed ears, probably arboreal in its

habits." His most recent publication is "The

Expression of the Emotions in Man and Ani-

mals, 1872. Mr. Darwin, who has been elected

a member of various foreign and English

scientific bodies, received from the Royal So-

ciety the Royal and Copley medals for his

various scientific works, and from the Geo-

logical Society the Wollaston Fellowship medal.

He has been created a Knight of the Order

Pour le Merite by the Prussian Government;

and in June 1871, he was elected a correspond-

ing member of the Academy of Vienna. The

University of Leyden conferred upon him the

honorary degree of M.D. in February, 1875.

THE TACTICS OF SHANGHAI has been pro-

posed to be a Judge of the Province of Kiang-

soo, which is regarded by the official classes

as carrying with it more honour than emolument.

## EXTRACTS.

## LOVE'S ONLY CHANGE.

And did you think my heart  
Could love the love I had  
From the buds that start  
In Spring, nor know returning  
Lovers the buds that start  
I loved you once, but now  
I love you more than ever.

With day and night I wait;  
And onward still must move  
To the buds that start  
I loved you once, but now  
I love you more than ever.

With gifts in these glad days  
How dearly I thought you  
Youth, shining love, and praise;  
These were the gifts I brought you,  
I loved you once, but now  
I love you more than ever.

A child with glorious eyes  
From its arms I had  
So sweetly I thought you  
Then grew to manhood, keeping  
I loved you once, but now  
I love you more than ever.

When you're pinching me  
Steps I'm sure to see  
And you're not contented  
I love you once, but now  
I love you more than ever.

GEORGE PARSONS LATIMER.

## GIANT SKY-SEARCHERS.

Cambridge, Mass., Jan. 5, 1882.

Were not for the astronomer's most valuable

instrument, the telescope, our knowledge

of the heavenly bodies would be as superficial

and incomplete as the theories of ignorance could

make it. The priority of the invention of

the telescope is a matter of dispute, reaching

far back into the past, but the question as to

who has done the most for its development

and perfection is not the man who has done

most for astronomy, by his inventions and

discoveries, than any one person now lives

in feeble old age in this out of the way place,

comparatively unknown, but possessing a

name and reputation in the astronomical

world which is overshadowed by none. The

name of Alvan Clark is not generally known

concerned by the reading public, but it is the

honored family title which the better times

back to the voyagers on the Mayflower, and

which has won its place upon the world of

honour.

Alvan Clark was born at Mursfield, Mass.,

in 1806, and married to Miss Pease, of Con-

way, Mass., in 1827. As Mr. Clark's life

of life is well known, the nearest we can

get to the place of his early life, as

received from his own lips, and to add

something descriptive of himself and his

surroundings. Born on a farm he laboured

in the fields until twenty-two years of age,

when having acquired considerable skill at

plumbing he secured a position as a

calculator at Lowell. At the age of

twenty-two he was employed in the grinding

of lenses. Acting upon the idea he soon

produced object glasses equal in quality to

any made. This determined his after life.

Giving up everything else he, with his son,

in 1846 commenced the manufacture of tele-

scopes, and has since been unrivalled in the

special work of figuring and grinding glass.

He is a real competitor of the greatest being

Thomas Cooke &amp; Sons, of Munich, Grubb,

of Dublin, and Cooke &amp; Sons, of York, England.

Mr. Clark is of medium height, dark, with scanty

hair, wears plain clothes and is entirely in-

teresting in his manner. He is quite feeble,

but does a little work occasionally, although

the heaviest of it comes upon his two sons.

He spends the greater part of his time in the

"works" conversing with the workmen.

THE LENS FACTORY.

Mr. Clark's observatory and works are

built in the garden of his house, which also

contains two tall mounting tubes. The

works were built in 1860, and during the

war they were kept busy turning out field

glasses and other optical instruments for the

Federal army. It was ten years, however,

after Mr. Clark's establishment as a tele-

scope maker, before his genius was appre-

ciated. At the end of that time he was

brought to the notice of the astronomers of the world

by the Rev. W. R. Dawes, one of the lead-

ing amateur astronomers of England.

AN ORDER FROM THE RUSSIAN GOVERNMENT.

Two years ago last September Otto Struve,

Director of the Observatory of Pulkovo,

Russia, visited the Clark as the representative

of the Czar and contracted with them for an

astro-photographic object glass of the

aperture of thirty inches. The terms

defined were as follows:—The definition of

the glass is to be in all respects not inferior

to that of the one at the United States Naval

Observatory, and the amount of light to be

greater in proportion to the increased area

of the object glass, allowance being made

for the absorption of the light by the glass.

When the rough design was ready for

approval the plan for fixing the glasses in

their cell. Struve was then to designate the

aperture of the focal length of the objective to

be not less than 13.1 feet, and the focal length

not greater than 201 feet, and the Clark was

then to make the focal length conform to this

ratio within one-fourth of one per cent. The

aperture of the objective was to be brought

to one focus by the combined action of the

lenses. When the objective glasses are com-

pleted the Clark are to construct a rough

reversible equatorial mounting for them, in-

cluding a tube of cast iron, form and thick-

ness as Struve may direct, the whole mount-

ing to be finished in the workshop of the

Clark. The Clark are to be supplied with the

glass may be safely tested by observation

of the stars at least one hour on each side

of the meridian. If in five years either

of the glasses shall be found to have de-

teriorated in figure or in the quality of its

surfaces as to injure its performance one

of the makers is to go to Pulkovo and re-

construct the defective glass. In consideration the

Clark are to be paid the sum of \$30,000 for the

work of the trial mounting. The Clark have

already finished the first or principal

parts of the objectives. The crown glass,

which has just been received from Paris, has

been found to be quite defective and another

has been ordered. This will greatly de-

lay the completion of the telescope.

THE GREAT THIRTY-SEVEN INCH TELESCOPE.

The Clark have now on hand an order

from the trustees of the James Lick estate

for the most powerful telescope in the

world. In December, 1874, Mr. James Lick,

of California, determined to erect a telescope

somewhere in that State. Mount Hamilton,

4,440 feet high, some thirteen miles east of

San José, Santa Clara county, was finally se-

lected upon as the site of the observatory.

Before anything was done, however, Mr.

Lick died and the trustees of his estate were

authorized to expend \$700,000 for the pur-

pose of the necessary land and the tele-

scope. A grant of land was obtained from

the United States and \$78,000 was expen-

ded.

## HONGKONG MARKETS.

AN IMPORTED BY CHINESE ON THE 23RD APRIL, 1882.

## COTTON GOODS.

American Drill, 30 yards, per piece \$1.25 to \$1.30

American Drill, 36 yards, per piece \$1.30 to \$1.35

Cotton Yarn, No. 10 to 20, per 400 lbs. \$8.00 to \$8.50

Cotton Yarn, No. 20 to 30, per 400 lbs. \$8.50 to \$9.00
